EDUCATION

- **Northeastern University - Khoury College of Computer Sciences** Boston, MA
Candidate for Master of Science in Computer Science Sep. 2019 – Dec. 2021
- **University of Mumbai** Mumbai, India
Bachelor of Engineering in Computer Engineering Aug. 2013 – June 2017

TECHNICAL SKILLS

- **Languages:** C, Java, Javascript, Typescript, Dart, HTML5, CSS 3
- **Frameworks:** Node.js, Express.js, Angular, React, Ionic, Spring Framework, Flutter, Firebase
- **Databases:** SQL, MongoDB, InfluxDB, RedisDB, GraphQL
- **Others:** AWS, Jenkins, Docker, Kubernetes, AJAX, Software Design Patterns, Mobile Development

PROFESSIONAL EXPERIENCE

- **Salesforce** San Francisco, CA
Software Engineer Intern, Mobify - Commerce Cloud May 2021 – Aug 2021 (on-going)
 - Contributed towards building the PWA Kit and Retail React App within Commerce Cloud using react hooks and isomorphic sdk to build wishlist workflow using best practices and leveraging headless storefronts.
 - Met with users enrolled in the beta program for the product to help them get on-boarded with PWA Kit enabling developers to build their products and understanding the challenges they face.
- **CVS Health** Smithfield, RI
Software Engineer Co-Op May 2020 – Dec 2020
 - Built a questionnaire builder used by pharmacists to assist patients, record responses and suggest medication as a part of the Retail offer management software.
 - Implemented a message configuration tool used by the data warehouse team and message delivery management tool to configure messages sent to 23 million CVS patients to facilitate business via SMS.
- **Faclon Labs Pvt. Ltd.** Mumbai, India
Software Developer II Jun. 2017 – Aug. 2019
 - Built a data management and visualization platform in Node.js, InfluxDB, MongoDB and lead front-end application development in Angular and Typescript while managing all facets of product development.
 - Implemented features used for monitoring various industrial processes including asset monitoring, predictive maintenance, automation, water and energy management.

ACADEMIC PROJECTS

- **Slick Chat - Realtime Messaging Service** Jan. 2020 — Apr. 2020
 - Designed a deployment pipeline and built a messaging app in Java and Angular to allow realtime messaging between users or group of users. A message could be text or media shared with end to end encryption.
 - Implemented best practices for software engineering like code reviews, sonarqube code coverage and built a Jenkins pipeline to monitor code pushed to git.
- **Voice Based Ticket Vending Machine** Jan. 2017 — Apr. 2017
 - Developed web app to assist blind people to book railway tickets using voice commands with Java Spring-boot, Angular, MySQL and Neo4j graph database.
